

# SafeWork has your back.

We are here to help to get you home safely.

## Our Promise

Information is not captured or shared for disciplinary action. There is no audio or video recording and no location tracker incorporated in the sensor or the data reporting.

# Understanding Your Safety Score

The SafeWork sensor collects motion data to create your Safety Score. Your Safety Score is calculated daily based on how far you bend forward, how fast you bend side to side, and how fast you twist.

## *Keep going!*

Every point increase to your Safety Score is a 7% decrease in your overall risk.
