

Return Home Safely

Strongarm exists to prevent injury, reduce physical stress and foster a healthier work environment.

Wearable Safety Sensors

Our sensors work like a FitBit or Apple Watch but are designed to help keep you safe while collecting information to help improve safety at your warehouse.

What the SafeWork System means for you:

-  Lower your chance of getting hurt
-  Sensor provides feedback on your movement as you work
-  Feel better when your shift ends by reducing strain
-  Daily metrics help your team understand safe work
-  Enhance feedback and communication with your supervisor
-  Your company invested in leading edge tech for your safety

Our Promise

Information is not captured or shared for disciplinary action. There is no audio or video recording and no location tracking used in the sensor or the data reporting.
